

CERTIFIED VR & AI PROFESSIONAL COURSE

€2250

PROFESSIONAL

In 7 live, 1-on-1 sessions, go from VR beginner to professional footwear designer – using Gravity Sketch, the same tool trusted by Nike, Adidas, and Puma. You'll build a complete 3D shoe from first wireframe to fully detailed, presentation-ready model, using AI tools to create high-impact visuals that get you noticed by clients and employers. Leave with a 3D shoe file, AI-enhanced portfolio visuals, and an Official Gravity Sketch Certificate.

YOUR LEARNING JOURNEY & OUTCOMES

A completed 3D shoe design – modelled, detailed and presentation-ready

A curated digital portfolio with 3D files and AI-enhanced visuals

AI-enhanced visuals ready to share on social media

Official Gravity Sketch Certification – global industry recognition

WHY THIS COURSE IS UNIQUE

Taught by a Gravity Sketch certified Global Expert and Instructor

Curriculum developed with Arts University Bournemouth

Global brands like Nike, Adidas, Puma and New Balance use these tools

Skills that translate to real production with MEES factory

WHAT YOU GET

7 live 1-on-1 sessions, 60 minutes each, delivered online

Personalised training fully adapted to your creative focus

AI-enhanced portfolio visuals – presentation-ready

Official Gravity Sketch Certificate

YOUR INSTRUCTOR

EKATERINA SAVOSINA · CORDWAINERS / UAL

Gravity Sketch certified Expert and Instructor – among the first globally to receive this accreditation. Footwear designer with 15+ years of industry experience, with designs sold across international brands in 120+ stores worldwide. She has trained professional designers at Nike, Adidas, Hoka and New Balance, and holds a BA (Hons) in Footwear from Cordwainers, University of the Arts London.

TESTIMONIALS

"The course completely changed how I approach design. Learning in VR with Kate made everything immediately intuitive. I went further in 7 weeks than I had in years of trying to learn 3D."
John, Footwear Designer

"From zero 3D experience to a portfolio-ready model. The 1-on-1 format made the difference – Kate adapted every session to exactly where I was."
Molly, AUB student

COURSE CURRICULUM

WEEKS 1-2

ONBOARDING & BUILDING THE WIREFRAME

Navigate VR environments and master Gravity Sketch tools, menus and essential 3D creation techniques. You'll develop spatial thinking and core construction skills to lay a solid foundation for your footwear design – building confidently in VR from day one.

Deliverable: VR workspace configured · Footwear design foundation built in VR

WEEKS 3-4

SURFACING – MIDSOLE, OUTSOLE & UPPER

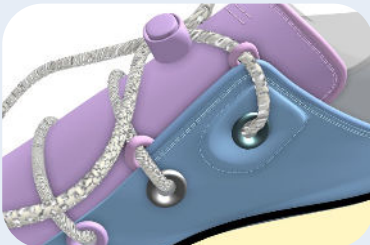

Introduction to subdivision modelling – construct and refine the shoe midsole and outsole, then build the upper using professional surface creation workflows. Develop form, proportion and structural detail to bring your shoe to life.

Deliverable: Midsole and outsole surfaced · Upper structure complete

WEEKS 5-6

DETAILING & PRESENTING

Add precision details and textures to bring your 3D model to industry-ready quality. Then build your digital design portfolio – curating your work and mastering presentation techniques for clients, employers or your own brand.

Deliverable: Fully detailed and textured model · Digital portfolio complete

WEEK 7

PROJECT COMPLETION & CAREER GUIDANCE

Use AI tools to transform your 3D model into ultra-realistic, high-impact images ready for your portfolio. Submit your completed work for Official Gravity Sketch Certification, then close with a live Q&A and personalised career path guidance.

Output: Gravity Sketch Certificate · AI-enhanced portfolio visuals
